RE: My Child At School App

Good morning

Last half term, we sent out a letter regarding our new school communications app, **MyChildAtSchool (MCAS)** which we will be using for all school communication from September.

The **MyChildAtSchool (MCAS)** app allows parents to view & amend their child's personal information, track their student's attendance and view announcements/letters sent from school. In the future, parents will also be able to book trips and pay for school dinners and nursery/ club fees. The service will also allow each parent/carer with parental responsibility to receive notifications and view their child's data, not only the one contact as our current system allows. **MCAS will replace the existing school text service so is vital that parents sign up so that you do not miss any important notifications.**

Over the next week, we will be sending electronic invitations to carers/parents who have parental responsibility and who we have a valid email address for. Once you receive this, you will be able to sign up for **MCAS** and view all announcements on your child's page. For you to continue receiving school communications, you must sign up to this system as soon as possible and enable push notifications so that you will be aware when a communication is sent to you.

As this is a significant change, we will be continuing to use our teachers2parents text service until the end of September but after this, communications will only be through the MCAS service so it is imperative that you sign up before we return to school in September.

If there are any issues, please do not hesitate to contact the office.

Many thanks

A Done
